

 OFFICIAL PROPOSAL**SMART QR INVITATION & GUEST MANAGEMENT**

From the invitation to the entrance, every guest journey becomes controlled and premium.

InviterSpace is not just a QR code. We prepare the guest list, generate individual QR invitations, create a beautiful event-day landing page, give staff a login-based admin system, and help the event team manage real entrance situations without confusion.

-  Invitation with individual QR
-  Beautiful guest landing page
-  Admin/staff/bouncer login
-  Check-in, check-out & food pass
-  Seating, notes & real-time reports

How the service starts: the client can provide their own invitation artwork, or InviterSpace can design the invitation as an add-on. Once the invitation is ready, we generate the requested number of individual QR invitations according to the selected package capacity. Each guest receives their own QR-based invitation, and that QR connects to the live event management system.

Built for the event team to handle easily

This system is designed so the client's event team, entrance staff, bouncers, or organizing committee can operate it without complicated technical work. They can scan, search, check in, check out, mark food passes, add notes, update tag-along counts, and add last-minute guests through a simple login-based interface.

Less confusion at the gate · faster guest handling · cleaner live records

On-site team attendance & transport

The package is prepared for self-operation by the event team. If the client requires a member from our team to be physically present at the venue for operational support, transportation must be covered separately by the client.

Transport is not included in the package price unless specially agreed.

What happens when a guest scans the QR?

Landing Page

A beautiful event page opens with countdown, event details, guest information, and optional venue/location details.

Event Guidance

Seat number, table number, food pass, transport details, and other required guidance can be displayed.

Entrance Control

Staff scan the QR and instantly see the guest details needed to check them in smoothly.

Live Updates

Check-in time, check-out time, food pass usage, notes, and attendance data update in real time.

Core system features included in every package

These are not separate luxuries. They are the real operational features that make InviterSpace valuable on the event day.

Individual QR invitations generated for the number of guests included in the selected package.

Beautiful QR landing page with countdown, event details, optional location, and guest-specific information.

Admin/staff login for event managers, bouncers, or entrance teams to operate the system.

Check-in and check-out with real-time timestamp visibility.

Food pass scenario from the same QR when meal access or eligibility needs to be tracked.

Seat/table visibility for guests and staff, including table numbers, seat numbers, or both.

Tag-along guest count when one invitation holder arrives with additional people.

Individual quick notes for specific guests and general notes/announcements visible to all logged-in staff.

Manual search and manual check-in if a guest forgets, loses, or cannot open the QR.

Last-minute guest adding at the gate or by the inviting committee with a simple workflow.

Extra data fields such as phone numbers, emails, categories, or any event-specific information.

Transport details can be added when guest pickup, drop-off, route, vehicle, or transport eligibility needs to be shown or tracked.

Real-time reports generated in one or two clicks using live event data.

Essential Suite

Rs. 25,000 /package

Best for smaller events that still need a professional QR invitation system, guest landing pages, staff login access, manual search, real-time check-in, seating visibility, notes, food pass handling, and live reports.

85 USD base package

Up to 100 guests

Invitation design: Rs. 1,500 / +5 USD

Profile photos add-on: Rs. 5,000 / +5 USD

WHAT THE CLIENT RECEIVES

Up to 100 individual QR invitations connected to the live system.

Guest landing page with countdown, event details, optional venue location, and guest details.

Standard admin panel and management interface for the event team.

Real-time report access for attendance and guest status in a few clicks.

Positioning: This is the entry-level package, but it still feels like a proper event management system. It is not just QR creation; it includes the landing page, staff operation, manual fallback, notes, transport details, seating visibility, and live reporting.

Professional Plus

Rs. 30,000 /package

For mid-size events where the guest count is higher and the organizer wants smoother verification with profile photo support included.

100 USD package

Up to 250 guests

Profile photos included

Invitation design: Rs. 1,500 / +5 USD

WHAT IMPROVES FROM ESSENTIAL

Up to 250 individual QR invitations for a larger guest list.

Profile photo verification included to help staff identify guests faster at the entrance.

Better mid-size event flow with the same core check-in, notes, seating, food pass, manual search, and live report features.

Stronger staff usability for entrance teams handling a higher number of invitees.

Positioning: Professional Plus is ideal for weddings, private functions, corporate events, award nights, launches, and events where guest verification should feel faster and more reliable.

Premium Elite

Rs. 40,000 /package

The full-scale package for larger events with 250+ guests. It includes all core system features, profile photos, complimentary invitation design, priority setup, and a dedicated seating arrangement map.

130 USD full coverage

250+ guests

Profile photos included

Invitation design free

Dedicated seating map

Priority support

PREMIUM ADDITIONS

250+ QR invitations for larger guest lists and scalable event requirements.

Dedicated seating arrangement map prepared according to the venue/table layout so staff can guide guests visually.

Directional guidance such as left/right side, table zones, VIP areas, family tables, media areas, sponsor areas, or category sections.

Custom invitation design included as a complimentary value addition.

Priority setup and handover for the event team before the event day.

Full event-control experience covering QR, landing page, seating, notes, tag-alongs, food pass, transport details, manual check-in, and reports.

Why this feels premium: for a larger event, only showing a table number is not enough. With the seating arrangement map, the staff can guide guests clearly: which side to go, which section to enter, which table zone to find, and how VIP or special guests should be handled.

Package difference at a glance

All packages include the same core system. The difference is mainly guest capacity, profile photo inclusion, invitation design inclusion, and the premium seating map.
